Superintendent

State of New Jersey

DEPARTMENT OF LAW AND PUBLIC SAFETY
DIVISION OF STATE POLICE

POST OFFICE BOX 7068
WEST TRENTON, NEW JERSEY 08625
(609) 882 - 2000

JOHN J. DEGNAN
Attorney General

COLONEL C. L. PAGANO
Superintendent

Dear Reader:

I am proud to announce that New Jersey has, for the second consecutive year, ranked first in the nation in traffic safety during the year 1977.

Statistics indicate that the death rate for the period was 2.1 traffic fatalities for every 100 million miles traveled. This ratio is the lowest in the country and is a direct result of the cooperation of all those who use the roadways of our State. We must, however, continue to make every effort to reduce traffic fatalities even further through strict compliance with the 55 mph national speed limit as well as the traffic laws of our state.

Hopefully, the continued efforts and cooperation of the public and federal, state and municipal agencies will help us maintain our traffic safety record in the year ahead.

The following pages contain statistics relating to fatal traffic accidents records for New Jersey, which were compiled by the Fatal Accident Unit of the Division of State Police for the year 1977.

Sincerely,

A handwritten signature in cursive script that reads "Clinton L. Pagano".

Colonel Clinton L. Pagano
Superintendent

Apparently Normal	932	161
Unknown	148	19
Total	1497	266

M. **ALCOHOL FACTOR**

There were 1108 Fatalities during 1977. Of this total, 764 were tested for alcohol and 344 were not tested. The various reasons for those not tested were: delayed deaths; age factors; contamination of samples, and the failure on the part of some investigative agencies and medical examiners to cause tests to be performed on victims. Of the Fatalities, 548 were drivers; 275 passengers; 266 pedestrians and 19 bicyclists. Of the 764 tested, 420 were positive for alcohol in varying degrees and 343 were negative. One was under the influence of drugs. This would indicate 54.9% of the fatalities tested were positive for alcohol and 45.1% were negative.

The attached chart is a breakdown of victims and the percentage of alcohol in each classification. An analysis of the chart by victim classification indicates the following:

1. **Drivers:**

There was a total of 548 drivers killed, of which 445 were tested. Of those tested 261 were positive and 183 were negative, for a 58.6% alcohol factor. One was positive for drugs. The .15% and over period alcohol level, has the largest number listed. Of the 261 imbibing drivers, 174 or 66.6% had an alcohol level of .10% or higher.

2. **Passengers:**

There was a total of 275 passengers killed, of which 127 were tested. Of those tested, 72 were positive and 55 were negative for a 43.3% positive alcohol factor.

3. **Pedestrians:**

There was a total of 266 pedestrians killed, of which 184 were tested. Of those tested, 85 were positive and 99 negative for a 46.1% alcohol factor.

4. **Bicyclists:**

There was a total of 19 bicyclists killed. Eight (8) bicyclists were tested for alcohol content. Of those tested, 2 were positive and 6 negative for a 25.0% alcohol factor.

Totals	65	66	66	80	196	80	80	80	196	344	13	13	343	344	1	1108

Legend:

Had Been Drinking: Includes those delayed deaths where an odor of alcohol was detected. Includes admittance of victim (in delayed death) or statements of witnesses. Includes lab reports which show a trace and not a percentage, or reading below 0.01%.

Negative: Tested and found to be negative.

No Test: Because of delayed death age factors, contamination of samples, and the failure on the part of some investigative agencies and medical examiners to cause tests to be performed on victims.

Note: One Driver victim was under the influence of drugs.

SPECIFIC AREAS OF CONCERN

INTERSTATE HIGHWAY FATALITIES

The Interstate Highway System of New Jersey is now approximately 78.4% completed. Of the 416.8 miles of roadway which are projected for this system, 326.91 miles have been opened to the motoring public. With this number of roadway miles open through a variety of areas such as rural, urban, flat, hilly, etc., an equal variety of accidents have become prevalent. Beyond the smaller "damage to property" type of accidents we are now encountering the non-repairable. . . the human fatality. Twenty percent of the thirty-six (36) fatal accidents which occurred during 1977 involved pedestrians. Thirty-six percent of the accidents had alcoholic beverages contribute heavily towards causing the accidents. Over the twelve month span, the death rate averaged 3.41 deaths per month, and one death for every 7.97 miles of roadway. In order to have a clear, concise picture of the type and age of victim, as well as the manner and contributing factors of these fatal motor vehicle accidents, the following facts are outlined for you.

Interstate Highway Mileage

Highway Number	Mileage Open	Fatal Accidents by Highway
I - 76	3.04	1
I - 78	57.06	5
I - 80	68.30	7

Alcohol Involvement

Of the 19 bicycle fatalities, eight (8) were tested for alcohol content. Two (2) were found to be over .15% and six (6) were negative. The remaining eleven (11) were not tested due to age factors, delayed deaths, etc.

MOTORCYCLE INVOLVEMENT

There were 89,415 motorcycles registered in New Jersey during 1977, compared with 85,206 in 1976, for a 4.9% increase. Following are statistics relating to Fatal Motorcycle Accidents that occurred in New Jersey during 1973—1974—1975—1976—1977.

Change					+ 10						+ 10						+ 24						- 7						- 14	

NOTE: The percentage of 18 - 20 year old drivers who were either drunk or impaired has increased since the inception of The Age of Majority Law on January 1, 1973.

Those who were drunk or impaired increased from 8.9% in 1972; to 16.3 in 1973; to 27.5% in 1974; to 29.2% in 1975; decreased to 25.9% in 1976 and increased to 32.4% in 1977.

Due to a change in law, as of July 1, 1977 all impaired drivers are carried as drunk drivers.
