# **INTRODUCTION**

The violence within the American domicile has been recognized for decades by elements of government and society with little done to correct the problem. Only recently has this phenomenon begun to receive the attention it deserves. In an effort to understand, identify and treat the incidents of abuse occurring in the home, the State of New Jersey, through its legislature, has provided the means to gain a meaningful insight into this issue.

In 1982, the Domestic Violence Act was instituted to protect battered victims and study the complex problems that spark such aggressive behavior. This legislation also provided the opportunity to identify the causes of violence in the home and put forth a more comprehensive effort to combat the crime of Domestic Violence.

Improvements since the implementation of the Domestic Violence Act are continuing. Pursuant to a change in N.J.S.A. 2C:25-24 enacted June 9, 1999, arrest data is presented by county. Domestic Violence restraining order violations are now captured and reported. Revised investigation and reporting procedures by the police; improved processing of domestic complaints by the courts; mandatory in-service training for police and court personnel have all enabled the victim to come forward and implement the constitutional rights granted to all Americans.

The following pages of narrative and graphics in this chapter are the result of gathered data displaying the complexities of domestic violence found within the State of New Jersey. It is through analysis of this data that, hopefully, the keys to preventing future violence can be found.
