

New Jersey State Police
Homeland Security Branch
Special Operations Section
Hazardous Material Response Unit

Emergency Medical Operations Course
Course # 06013 3rd Edition

In preparing to conduct this revised training course, instructors will need to review completely the contents of the training program as much has changed from the previous edition.

Student Manual (SM)

The Student Manual (SM) has not changed. It is available on the CD and the NJHAZMAT INSTRUCTORS Yahoo group site.

Instructor Guide (IG)

There is no specific IG at this time. However, notes have been placed in the Powerpoint Note pages for each slide requiring an explanation.

Hands-on training

This training program involves hands-on activities that are designed to provide the attendee a working knowledge and level of competency in specific functions. A skill performance sheet for each of the work stations and practical drill is placed in the Hand-out folder of the CD.

Pre-course Quiz

There is a pre-course quiz. There are two forms of the quiz

1. Written which the instructor will need to print prior to class
2. In PPT format.

There are answer keys provided for the written quiz.

Module I, Section 1

No specific notes at this time.

Module I Section 2

This module is a review of the HM Awareness class and as such can be performed faster than other modules.

Module I Section 3

This module is a review of the basic terms associated with response and operations at a scene of a HM release.

Module I Section 4

This module contains a broad overview/review of control zones, evacuation principals and a simple scenario.

Module I Section 5

This module addresses the PPE issues and concerns. Since personnel will be required to wear APR's a fit test is required prior to coming to class.

Module II Section 1

This module is a brief overview on response notification protocols

Emergency Medical Operations Course
Course # 06013 EMS OPS 3rd Edition

Module II Section 2

This module addresses the IMS/NIMS policies. The class pre-requisites are IMS 100, 200, 700 – if all attendees are in compliance, then INSTRUCTOR may accelerate this module presentation.

Module II Section 3

This module addresses basic assessment and student exercise which will assist the attendee in the process.

Module II Section 4

This module addresses forms and records management issues.

Module III Section 1

This module addresses Medical Monitoring issues.

Module III Section 2

This module addresses signs and symptoms of exposure.

Module III Section 3

This module addresses Decontamination, types, process and set-up.

Module III Section 4

This module addresses patient care issues

Module III Section 5

This module addresses Transport concerns and TRIAGE TAGS

Module III Section 6

This module addresses Medical Monitoring and REHAB issues. This is a long module, and is designed as a stand-alone module, but is intended here as a broad overview.

Module III Section 7

This module addresses post incident wrap up and analysis

Module IV

This module addresses final scenario's final exercise and final examination

Final Examination

There is final examination which is designed to be issued at the conclusion of the class to check retention of information learned. It is highly suggested to conduct this exam as individuals. You can then review the questions and answers as a group.

**ALL EXAMS SHALL BE FORWARDED TO NJSP HMRU along with Registration forms
Course Evaluations and Course Report Form.**
